FOR DEFINITIONS

THIS ANTENNA IS GROUND INDEPENDENT

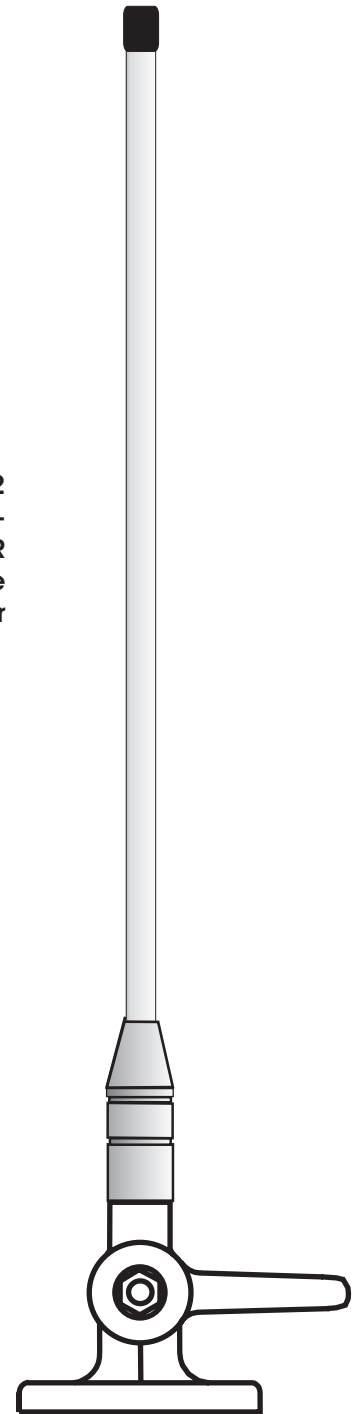

The Code 746 is a high performance antenna using three 1/2 wave section radiators. This provides high gain, giving reliable off-shore cell-phone coverage. Our unique design gives low VSWR and broad bandwidth. Supplied with a quality standard marine mount, ideal for any style and construction of sailing yacht or motor cruiser.

- High gain plus diversity reception
- No tuning necessary
- Approx 820mm long
- White nylon standard marine mount
- Complete with 20cm pigtail of low loss double shield coax and N female attached
